Skills

- Bilingual (Spanish and English)
- Team Management
- Construction
- Web Development
- Node | MongoDB | Mongoose | HTML | JavaScript | CSS | Git | Github | Responsive Web Design | React.js | Express.js | Python | Django | SQL

Relevant Experience

NEWT (Group Project)

Github | Deployed

- Designed the layout of the project. Utilized React to create the community page which will update every time a new user signs up. Each user has its own id which is used to implement authorization features.

Fish Tracker

Github | Deployed

- Used EJS templates to render views to my users. Integrated Google OAuth authentication to make it easier for users to sign in using their google accounts. This project also contains full-CRUD data operations using JavaScript and Mongoose. Implemented MongoDB database to store the information the users enter. Lastly, I incorporated basic authorization features for users who are logged in and styled the app.

Work Experience

The Home Depot

Freight Team Supervisor   June 2021- April 2022

- Supervised a team of 20 associates and made sure they were on task, while also Establishing a proficient workplace for my teammates by motivating, correcting and recognizing them, which resulted in the team performing more organized and efficiently.
- Trained new associates on the process of receiving trucks, packing out the product and letting them know the expectations of their role.
- Directed my team to do various tasks to keep the store clean and ready for opening.

White Rock

Drywall Hanger   August 2017 - December 2019

- Coordinated my time wisely to ensure that we finished at a reasonable time and moved on to the next jobsite.
- Interpreted what the client said to my team to confirm how the work should be done.

Education

Georgia State University
General Assembly Software Engineer   May 2022- August 2022

Last updated: August 2022
